

## Cooling

Freshness, extend it.

Our extensive cooling portfolio ideally complements your kitchen and inspires the private chef with the freshest of ingredients. Our flexible modular and free-standing ranges have the ability to sense and react to the most delicate and demanding of foods in an intelligent way. The large, fragrant Japanese Shiso mint leaf is a delicate seasoning, a bold garnish and even a wasabi receptacle. It requires sensitive refrigeration.

Some provisions require that little bit longer to mature, while others favour a particularly cool environment. The impressive Vario 400 and 200 series refrigerators, freezers, fridge-freezer combinations and wine climate cabinets offer multiple, separate climate zones. Their exceptional performance is thanks to the quality and precision of their cooling technology. Food is maintained in optimal conditions to ensure radicchio stays crisper, grapes last longer, meat and fish taste fresher.

For the wine lover, your collection requires more cherishing than the delicate mint leaf. Your wine needs to be stored, protected, showcased and prepared for enjoyment. These are competing functions which your wine climate cabinet, equal to a wine cellar, achieves year after year with unflappable aplomb.

## The Vario cooling 400 series

A fully integrated, built-in modular family: refrigerators, freezers, fridge-freezer combinations and wine climate cabinets can be partnered in a multitude of ways to create an impressive display. Should you wish them to stand out, you can even customise the effect with the addition of stainless steel doors.

The new Vario 400 cooling series is a professional modular system made from fully integrated built-in appliances. Reduced to the essence of pure refrigeration, their design is most impressive when combined in countless variations to form an elegant cooling wall. Beyond its imposing visual effect, this array can also increase the flexibility of the kitchen's interior space. This is cooling that makes an architectural statement.

Our wine climate cabinets are equally exacting; display lighting and crafted bottle trays show off your coveted wine collection like an art exhibit. Up to three separate zones, provide you with both a cellar environment and the perfect drinking temperature. All you need do is remove the cork.

Push the enormous stainless steel door and it opens to a professional-grade stainless steel interior with dark anthracite anodised aluminium elements, housing almost imperceptible clear glass shelving. The two new opening assist options allow even the largest and heaviest of doors to be opened effortlessly, either by pulling or, for the handleless option, with a gentle push.

The minimalist internal aesthetic is accentuated by warm white, glare-free LED lights that discreetly and gently illuminate. Thanks to the near-invisible rail system the heights of the shelves and door racks can be easily adjusted and even aligned to produce a reduced, pleasingly uniform, appearance.

Cooling precision is assured with evenly distributed temperatures, while a variety of climate zones can also be individually adjusted. Using Home Connect, the appliances integrate into your digital home, and can be adjusted remotely. Ideal storage conditions are also met inside the cooling drawer, preserving your meat and fish for longer, thanks to temperatures close to, or even at, 0 °C.

Fully extendable freezer drawer and warm white, glare-free LED lights

Solid dark anthracite anodised aluminium door racks

## The wine climate cabinets

For serious wine aficionados, wine is a passion bordering on obsession, equalled only by the desire for the ultimate in storage. A wine climate cabinet needs to not only maintain constant temperatures ensuring storage precision, but also showcase your collection whilst enhancing the prestige of your kitchen.

The Vario wine climate cabinets 400 series now make it even easier to access your collection with assisted opening. The choice of pull or push-to-open mechanism is dependent upon whether you opt for handles or not. Hidden telescopic rails allow the bottle trays to fully extend, while the use of oak rods and dark anthracite aluminium gently secure the wine and enhance the presentation.

Up to three independently controlled climate zones are controlled via the intuitive TFT display. Part of your collection can be stored in cellar-like conditions while those bottles that should be enjoyed now, can be served on demand. Humidity is maintained at a specified setting whilst sound and vibration are minimised, ensuring a calming environment, inside and out.

A choice of five pre-set options using of warm white, glare-free LEDs further help to present your impressive collection in a flattering light.

With niche widths of 45.7 cm to 61 cm and heights between 82 cm and 213.4 cm, the wine climate cabinets can be fully integrated into a wall configuration or fitted beneath a counter. Electronic temperature control guarantees constant temperatures between 5 °C and 20 °C.

Illuminate the wine or decanter with the dimmable presentation light. It highlights without adversely affecting the contents and the cabinet maintains the wine's temperature, so that each glass is sampled at its best.

**The fully integrated wine climate cabinet** blends effortlessly into a cooling wall concept, providing easy access to your prized possessions. While oak rods protect the label and the special glass door shields the wine from UV damage, the lock is the only thing protecting it from you.

**Under-counter wine climate cabinet** integrates perfectly into any kitchen whilst offering one or two climate zones and even a dimmable presentation light. Despite fitting into the constrained space under a counter, it holds up to 42 bottles in perfect comfort.

The interior environments of all wine climate cabinets have been constructed with materials designed to have no effect on aroma or taste, with the internal air even being passed through activated charcoal filters. Exceptional engineering has gone into making the compartment virtually vibration-free and the cushioned door closing system ensures you do not disturb any remaining bottles.

## The Vario cooling 200 series

This range of refrigerators, fridge-freezer combinations and freezers fits perfectly into any standard integrated kitchen design and yet manages to offer greater internal space than standard cooling appliances.

We achieved this with some intelligent engineering, relocating part of the technology into the plinth. Not only do you have greater space to work with, you also have some rather brilliant advantages: up to four climate zones, Gastronorm insert shelving and the fresh cooling close to 0°C drawers that maintains the originality of your salmon, steaks or artichokes. Several appliances even offer Home Connect, allowing your appliance and smart home to be digitally integrated.

Smooth-running, fully-extendable shelves and drawers mean all that clever space is easy to access. And when you do, finally, close the door, it will soft close for you.

Elegant and impressively efficient, the fridge-freezer, refrigerator and freezer range offers multiple combinations. Each with a niche dimension of 56 cm wide and 177.5 cm high. With a more considered and innovative approach to their development, everything has been maximised: space, performance, energy efficiency and choice.

Private chefs know that there are great differences in how food needs to be stored. With our refrigerators, foods can be separated and enjoy bespoke preservation. Alongside one generous cooling zone are numerous drawers – one with humidity control for delicate and precious groceries.

Stepped shelving allows for that extra large item to fit in, effortlessly. Special Gastronorm inserts can be added, expanding your cuisine accomplishments, making it a seamless journey from prep and fridge to cook and serve. Not only will you save on dishes, you will make the most of the internal space. The inserts slide smoothly into their specific slots.

The fridge-freezer combinations offer multiple climate zone within their enlarged flexible space. The 4-star freezer is equipped with No-Frost technology, removing the burden of thawing it out. Other impressive functions include electronic temperature regulation and fast freezing.

The wine and champagne racks hold up to four bottles and should you ever find yourself without, the rack folds out of the way.

The stepped shelving and Gastronorm inserts
