COFFEE MAKING MACHINES

The Gaggenau Expressive series fully automatic espresso machine

FULLY AUTOMATIC ESPRESSO MACHINE

Elevate your coffee experience

When creating your perfect coffee, you have two options: Classic mode for quick, simple preparation and Barista mode for professional-level customisation, where inputting the roast level of your beans will automatically adjust the grind and a variety of other parameters. These perfected settings can then be saved in personalised favourites, to be repeated quickly, easily, automatically.

Cleaning and descaling are also automatic, while intuitive animations and images provide clear, visual instructions on how to efficiently operate your coffee machine. Convenience, personalisation and precision turn a daily routine into a joy.

The Gaggenau Expressive series oven, fully automatic espresso machine with culinary warming drawer, combi-steam oven and vacuuming drawer

A selection of the coffees and teas that can be perfected

Fully automatic espresso machine and culinary warming drawer 200 series

THE COFFEE MACHINE

Brew your best

Create up to 12 types of coffee, and have the machine remember 8 personalised options, adjusting strength, temperature, amount of milk and coffee and number of cups. Make other hot water and milk drinks easily, the insulated milk container is even situated on a weighing scale, allowing the machine to warn you if the milk is running too low to make your choice of beverage.

At every stage of its preparation, your coffee's water is kept at a constant temperature, to release the aroma but not the bitter compounds.
